Phorm on Security Now Podcast

Jim Murray, Saturday 21 June 2008 - 18:51:21

Episode 149 of the "Security Now" Podcast on the Twit.tv network is all about "Phorm". It will be available to download in the UK on Friday 20th June from http://www.grc.com/securitynow.htm or http://www.twit.tv/sn

Based on previous podcasts I expect the hosts Steve Gibson and Leo Laporte to objectively highlight the real problems of privacy that Phorm presents for people on affected ISPs.
